Summary of Capabilities

Manufacturing - All standard and special sizes from 3 ½" x 5" through 10x13" booklet and 12 x 15 ½ open end – all commercial sizes from #6 ¼ through #14 including remittance-style envelopes. We make all kinds of special size envelopes including A-style, baronial, and bang-tail as well as special windows. We have hundreds of die sizes in stock: side seam and diagonal seam.

Converting – All sizes per above. We will convert your sheets or can supply stock either printed or unprinted. We can convert up to 65# cover weight on commercial sizes and up to 80# on many booklet or catalog sizes. We'll work with certain hard-to-fold or handle stock such as coated 2 side, translucent and bag kraft.

Printing - One 6" and two 3" jets print 2/2 and can handle sizes up to 15 ¼ x 18-1/8" including tyvek and translucent stock. One 6", **4 color process** jet press prints pre-converted envelopes of the same sizes. **5 color digital printing** capability. Sizes from approximately 3x5 up to and including 10x13".

Specialty/Bindery items – We provide tabbing, banding, perforations, hole-punching, die cutting, and shrink-wrapping. Our high-speed folders can do multiple folds on most size envelopes in one pass. We can also add peel and seal and latex seal to envelopes.

EQUIPMENT LIST

1 – **Halm Jet Press, 3"**, 2 color perfecting, dual top & bottom feeders.

1 - **Halm Jet Presses, 3"**, 2 color perfecting, top feeder.

1 – **Halm Super Jet Press, 6"**, 2 color perfecting, dual top & bottom feeders.
